Company Profile

PMH established in 1972 as import and distributor specializing in very narrow aisle forklifts, has over 40 years of field experience. PMH has broadened its product offering to the US market with BP/Fiora Sidelift vehicles. The companies flagship trade mark "Steinbock" remains a well known identifying brand of quality German built very narrow aisle turret forklift trucks.

Providing sales partners with assistance, our customers with in-depth product knowledge, application design, facility layouts, energy consumption, warehouse logistic integration custom product engineering, PMH provides the link for material handling integration.

Technology Research and Development

As an innovative leader, PMH offers the widest range of narrow aisle material handling solutions. Our “Steinbock” line of turret trucks offers solutions by adopting and developing custom vehicle designs. Eight models provide the basis for the solutions with capacities from 2425 to 4400 lbs and lift height to 56’.

Steinbock offers a wide variety of load handling options. Which can be as unique as the double deep pallet handler, center pivot turret or a stacker crane replacement telescopic fork. Our 4th generation ~AC brushless motor technology supports the drive, pump and steer motors and has been incorporated in our products for years.

Company Products

FIORA has always been an innovative leader, by adopting and developing custom solutions with high tech integration. FIORA was the first company to offer cushion rubber wheels, together with a suspension balanced chassis to provide a smooth & stable operation on uneven floors or pavement.

FIORA uses absolute value encoders for the control and management of the 4 wheel steer axes. FIORA utilizes open can-bus technology to reduce electrical wiring throughout the entire vehicle. ~AC brushless motor technology has been a staple on our products for years.

Main activities:

- RESEARCH AND DEVELOPMENT
- DESIGN
- PRODUCTION
